Ultima SVGA Monitor Y-Cable

HD15 male to HD15 female x2 monitor y-cable

Benefits and Features

- Provides performance monitor connection that maximizes color and imaging
- 24k gold connectors provide maximum corrosion resistance for error-free data transfer
- Ultra-flexible jacket and oversized thumbscrews make installation easy
- Heavy-duty molded strain relief provides increased flexibility and durability
- Constructed of 3 individually shielded 75-ohm coax and 4 twisted pair cable to minimize cross talk, noise, and other interference
- Aluminum undermold shield assists in reducing EMI/RFI interference to meet FCC requirements
- Splits the (S)VGA signal providing simultaneous display of the same picture

The Ultima Series of PC cables from Cables To Go combines style, quality, performance and value, while giving you the ultimate in cable technology. The sleek design of the molded connectors makes them easy to grip. The connectors are color coded to match the ports on your personal computer or notebook, ensuring a simple connection. The charcoal gray cable jacket not only matches your case but disappears behind your desk leaving a clean organized look. Constructed with UL tested and certified cable, the Ultima Series meets the rigid standards of everyday use. The cable is double-shielded with a dual foil and braid. Copper foil wraps the undermold, while a 360-degree solder-to-connector shell and cable braid create an end-to-end shielding solution for a noise-free connection.

Ultima SVGA Monitor Y-Cable

HD15 male to HD15 female x2 monitor y-cable

RGB (Red, Green, Blue) monitors require separate signals for each of the three colors. This differs from color televisions, for example, which use composite video signals, in which all the colors are mixed together. All color computer monitors are RGB monitors and display anywhere from 16 to over 1 million different colors.
