

Model US28xTP 8-Button Tabletop Pedestal Controller

FEATURES/BENEFITS

- **Simple, Plug-in Installation**
 - Locate anywhere in the home: nightstand, entertainment room, kitchen, etc...
- **Provides Remote ON/OFF and DIMMING Control**
 - Control UPB lighting and appliances with the push of a button
- **Create and Control Beautiful Lighting Scenes**
 - Each button can control an individual UPB device, or be linked to several UPB devices to create a lighting "scene" with preset light levels
- **Manual scene-link changes with rocker/buttons**
 - Add or delete devices from scene with 7 or 8 taps
 - Adjust linked devices' light levels and save with 7 taps
- **Custom Labeling**
 - Each button can be custom-labeled using the Model ZLK-01 Labeling Kit.
 - Labels can be changed if the US28xTP is reprogrammed for different functionality
- **Pedestal Enclosure Accessory (Model ZTP2-x)**
 - Convert any SimplyBrilliant Standard or Universal Transceiver Switch to a remote control that can be plugged-in anywhere in the home
- **Available in Black and White**

DESCRIPTION

Model US28xTP Tabletop Pedestal Controller is designed around the popular SimplyBrilliant US2-40 UPB transceiver switch base that has over 75 different field configurable faceplate options. The Tabletop Pedestal can be preconfigured with an 8 button (bar or oval) faceplate and enabled for remote ON/OFF and dimming control of any UPB devices in the home.

With no new wiring or use of radio frequency signals, home owners now have the ability to control their UPB lighting wherever a power outlet is available. Beautiful indoor or outdoor lighting scenes or just basic safety and security can be realized using the Tabletop Controller with UPB wall switches, plug-in modules and fixture modules.

Each button of the Tabletop Controller can be linked to a specific UPB device or it can be programmed to activate and de-activate a lighting scene made up of several UPB lighting control devices, such as outdoor garden or decorative-seasonal lighting.

The elegant design of the Tabletop Pedestal was made to complement the décor of any home. As a convenient entertainment room accessory or a nightstand necessity, the tabletop controller is an excellent addition to any UPB home automation solution.

Model ZTP2-x is a Tabletop Pedestal enclosure with power cord into which a SimplyBrilliant Standard or Universal Dimming-Controllers can be installed. This accessory allows an installer to configure the pedestal with any one of Simply Automated's 78 different switch and faceplate combinations.

INSTALLATION

Installation is simple: plug it into any standard duplex receptacle in the home. Once the US28xTP is configured, it can be unplugged and moved anywhere in the home without losing its programming. The Tabletop Controller is easy to manually program after initial configuration.

Manual scene-link modification capabilities are unique to Simply Automated devices. A user can easily change existing scenes, adding or removing devices and adjusting light levels, by pressing rockers/buttons in a specific sequence (see User Guide for details) without using UPStart.

SPECIFICATIONS

Power	120Volts AC, 60Hz
