Introducing Lumina...
Sophisticated lighting control
that's affordable and easy to install

Enhance the value and enjoyment of your home with Lumina, a central lighting and control system.

Elegance is easy with Lumina...

What sets the Lumina apart from other whole house lighting controllers?

Easy to install. No need for new wiring - the Lumina uses UPB, the most advanced digital communication standard available which transmits over standard electrical wires. Simply hang it on the wall and use the supplied LCD keypad to set it up.

Easy to operate. Lights come on as programmed or with the push of a button. Want to change one of the preset lighting scenes? Simply press the scene button five times and the new scene is memorized.

Unrivaled expandability. Add options like telephone, touchscreen, Internet access and control, coordinate with thermostats, Windows Media Centers, Multi-Room Audio Systems, and security systems for a comprehensive "smart house" system.

Ideal for new or retrofit construction...No need to install new wiring!

Lumina in Your Home

Room by Room...

Control Scenes in a Room

Kitchen

- subdued lighting for casual dinner
- gentle light for morning

Great Room

- reading scene for glare-free reading
- full brightness for finding keys or remote

Home Theaters and Media Rooms

- watching a movie or intermission lighting
- pathway or low lights for entering a room

...And Whole House Lighting Control

Away-lights and temperatures adjusted for energy savings

Sleep- dimly lit pathway lights to bathroom or kitchen, all others off

Special-create a unique scene based on occasion

Home-lights in main areas set to desired brightness

Vacation-lights change periodically for lived in look

Party-landscape and indoor lighting set beautifully

Convenience. Accurate dusk to dawn lighting control year round. Schedule lights by sunrise/sunset, motion, or event.

Safety. Lights in driveway, front porch, or garage when arriving home.

Energy Savings. Simply press one button to save energy.

Options:

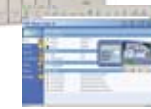

Touchscreens with Video and/or Audio control

Coordinate with Thermostats for Energy Savings

Access and Control Lights over the Internet or telephone

Lumina Supports HLC Lighting Products

HAI Lighting Control, or HLC, is a complete line of "smart" switches and controllers that work with the Lumina and Lumina Pro.

Lumina can also operate lighting devices by other manufacturers, including X-10 based devices, ALC, and others. For more information, including technical specifications, please visit www.homeauto.com.
