

Model 71A00-1 HLC Load Control Module

DESCRIPTION

The Model 71A00-1 HLC Load Control Module is a remote controlled heavy duty switch which may be used to operate 120VA or 240VAC electrical appliances, such as water heaters, pool pumps, baseboard heaters, branch lighting loads, etc. It can be controlled locally by using the Decora-style rocker switch or remotely by a UPB powerline signal. It also features a manual disconnect switch.

INSTALLATION

Install according to Figure 1 or Figure 2. The Model 71A00-1 contains a 35A00-3 HLC 600W Non-Dimming Switch. Refer to the instruction sheet for the 35A00-3 provided for additional information regarding safety, operation, and programming.
