Let ELK's M1 Home Control Secure and Simplify Your Life!

Home Solutions

M1, by ELK Products, makes security and automation solutions easy, flexible, scalable and affordable. As a robust solution, M1 provides Home Control, Energy Management, Lighting, Security, and more, combined into one comprehensive, yet easy-to-use system you will enjoy for years to come.

Home Control

Whole-house control solutions provide you the ability to manage and control your entire home without the hassle of going from room to room turning things on and off. M1 uniquely transforms a sophisticated home control solution into a user-friendly system. Just about any electronic feature in your home can be controlled, from sprinklers, to water valves, audio/video, gates and garage doors, spas, and more.

Solutions:

- Set your home for parties, night time or vacation modes with the push of a single button.
- Use voice alerts during the day to make you aware of door openings but then silence the voice at night time.
- Allow access, set lighting and adjust temperature based on the specific person entering your home, such as grandma, housekeeper, caregiver, etc.
- Utilize sensors to automatically adjust irrigation needs based on recent rain conditions.

Security

M1 enables you to have the robust security system that you need to protect your family and home. Whether you are purchasing a new home or modifying an existing one, M1 offers options that are designed for your preference. ELK's M1 provides the ultimate protection and reporting for intrusion, fire, carbon monoxide, water leaks, and medical emergencies.

Solutions:

- Create a safe pathway for your family by providing them the ability to turn on lights from inside their car or automatically when they arrive home.
- Receive notices through alert chimes when doors are opened to know when children are going out or guests are arriving.
- Get a signal via a flashing keypad that something needs attention, such as an open back door or garage door.
- View activities in or around your home through discreet cameras, whether you are there or away.

Lighting

Lighting control provides many possibilities from safety to ambiance, such as vacation lighting to elude intruders or soft lighting for entertaining. Additionally, you will enjoy the financial benefits of controlling your energy costs through managed lighting solutions. M1 will enable you to set pre-determined groups of lights for activities such as cleaning, watching movies, celebrations, and more.

Solutions:

- Start your day by awakening to soft lighting that progressively brightens your room.
- Take the hassle out of turning on and off holiday lighting by allowing M1 to do it for you.
- Use a simple key press at bedtime to turn off all the lights in the house.
- Set night lights to come on at dusk so you can walk through the house without turning on overhead lights.

Energy Management

Control costs and go "Green" with M1's energy management solutions. M1 enables you to manage energy output, shrink your carbon footprint and lower your utility bills.

ELK's M1 energy management system provides convenient control and scheduling capabilities for lighting, climate control, shades/blinds, electric water heaters and other electrical devices. You can conserve energy and reduce costs without compromising your comfort.

Solutions:

- Use temperature set points to automatically control ceiling fans to minimize HVAC needs.
- Turn the electric water heater off when you are away.
- Turn off lights automatically when someone exits a room.
- Auto-adjust your thermostat based on time of day, occupancy and ambient conditions.

M1 can be controlled with tablets, keypads, smartphones and other popular electronic devices. With all of these devices, no matter if you are at home or away, you can easily enjoy a variety of benefits such as:

- Being notified when a guest arrives or leaves the house
- Receiving a text message that your water system has been turned off due to a leak
- Adjusting the temperature of your vacation home prior to your arrival

Relax knowing that control of your home is at your fingertips no matter where you are.
