

SWIPE THE MAGIC

Sometimes a small gestures can have a great impact

If only everything was this simple

Actions speak louder than words.

The action of gestures helps us communicate with other people,
express our emotions, and visualize what we expect....

So why not use gestures to communicate with our smart home?

With the intuitive nature of gestures in mind, we designed SWIPE-
a remarkably beautiful device with a brilliantly functional design.

Swipe gives you the power to control your smart home with natural
movements of your hands. It's not only a uniquely designed photo
frame, but also an intuitive controller, which activates scenes
without the need to touch anything.

In this magical way, your life becomes even more convenient

Now it's your move

It's really easy... Swipe your hand down to turn off lights. Move your hand up and color LED lights will light up the room.

Swipe to the right if you want to turn off TV and other appliances.

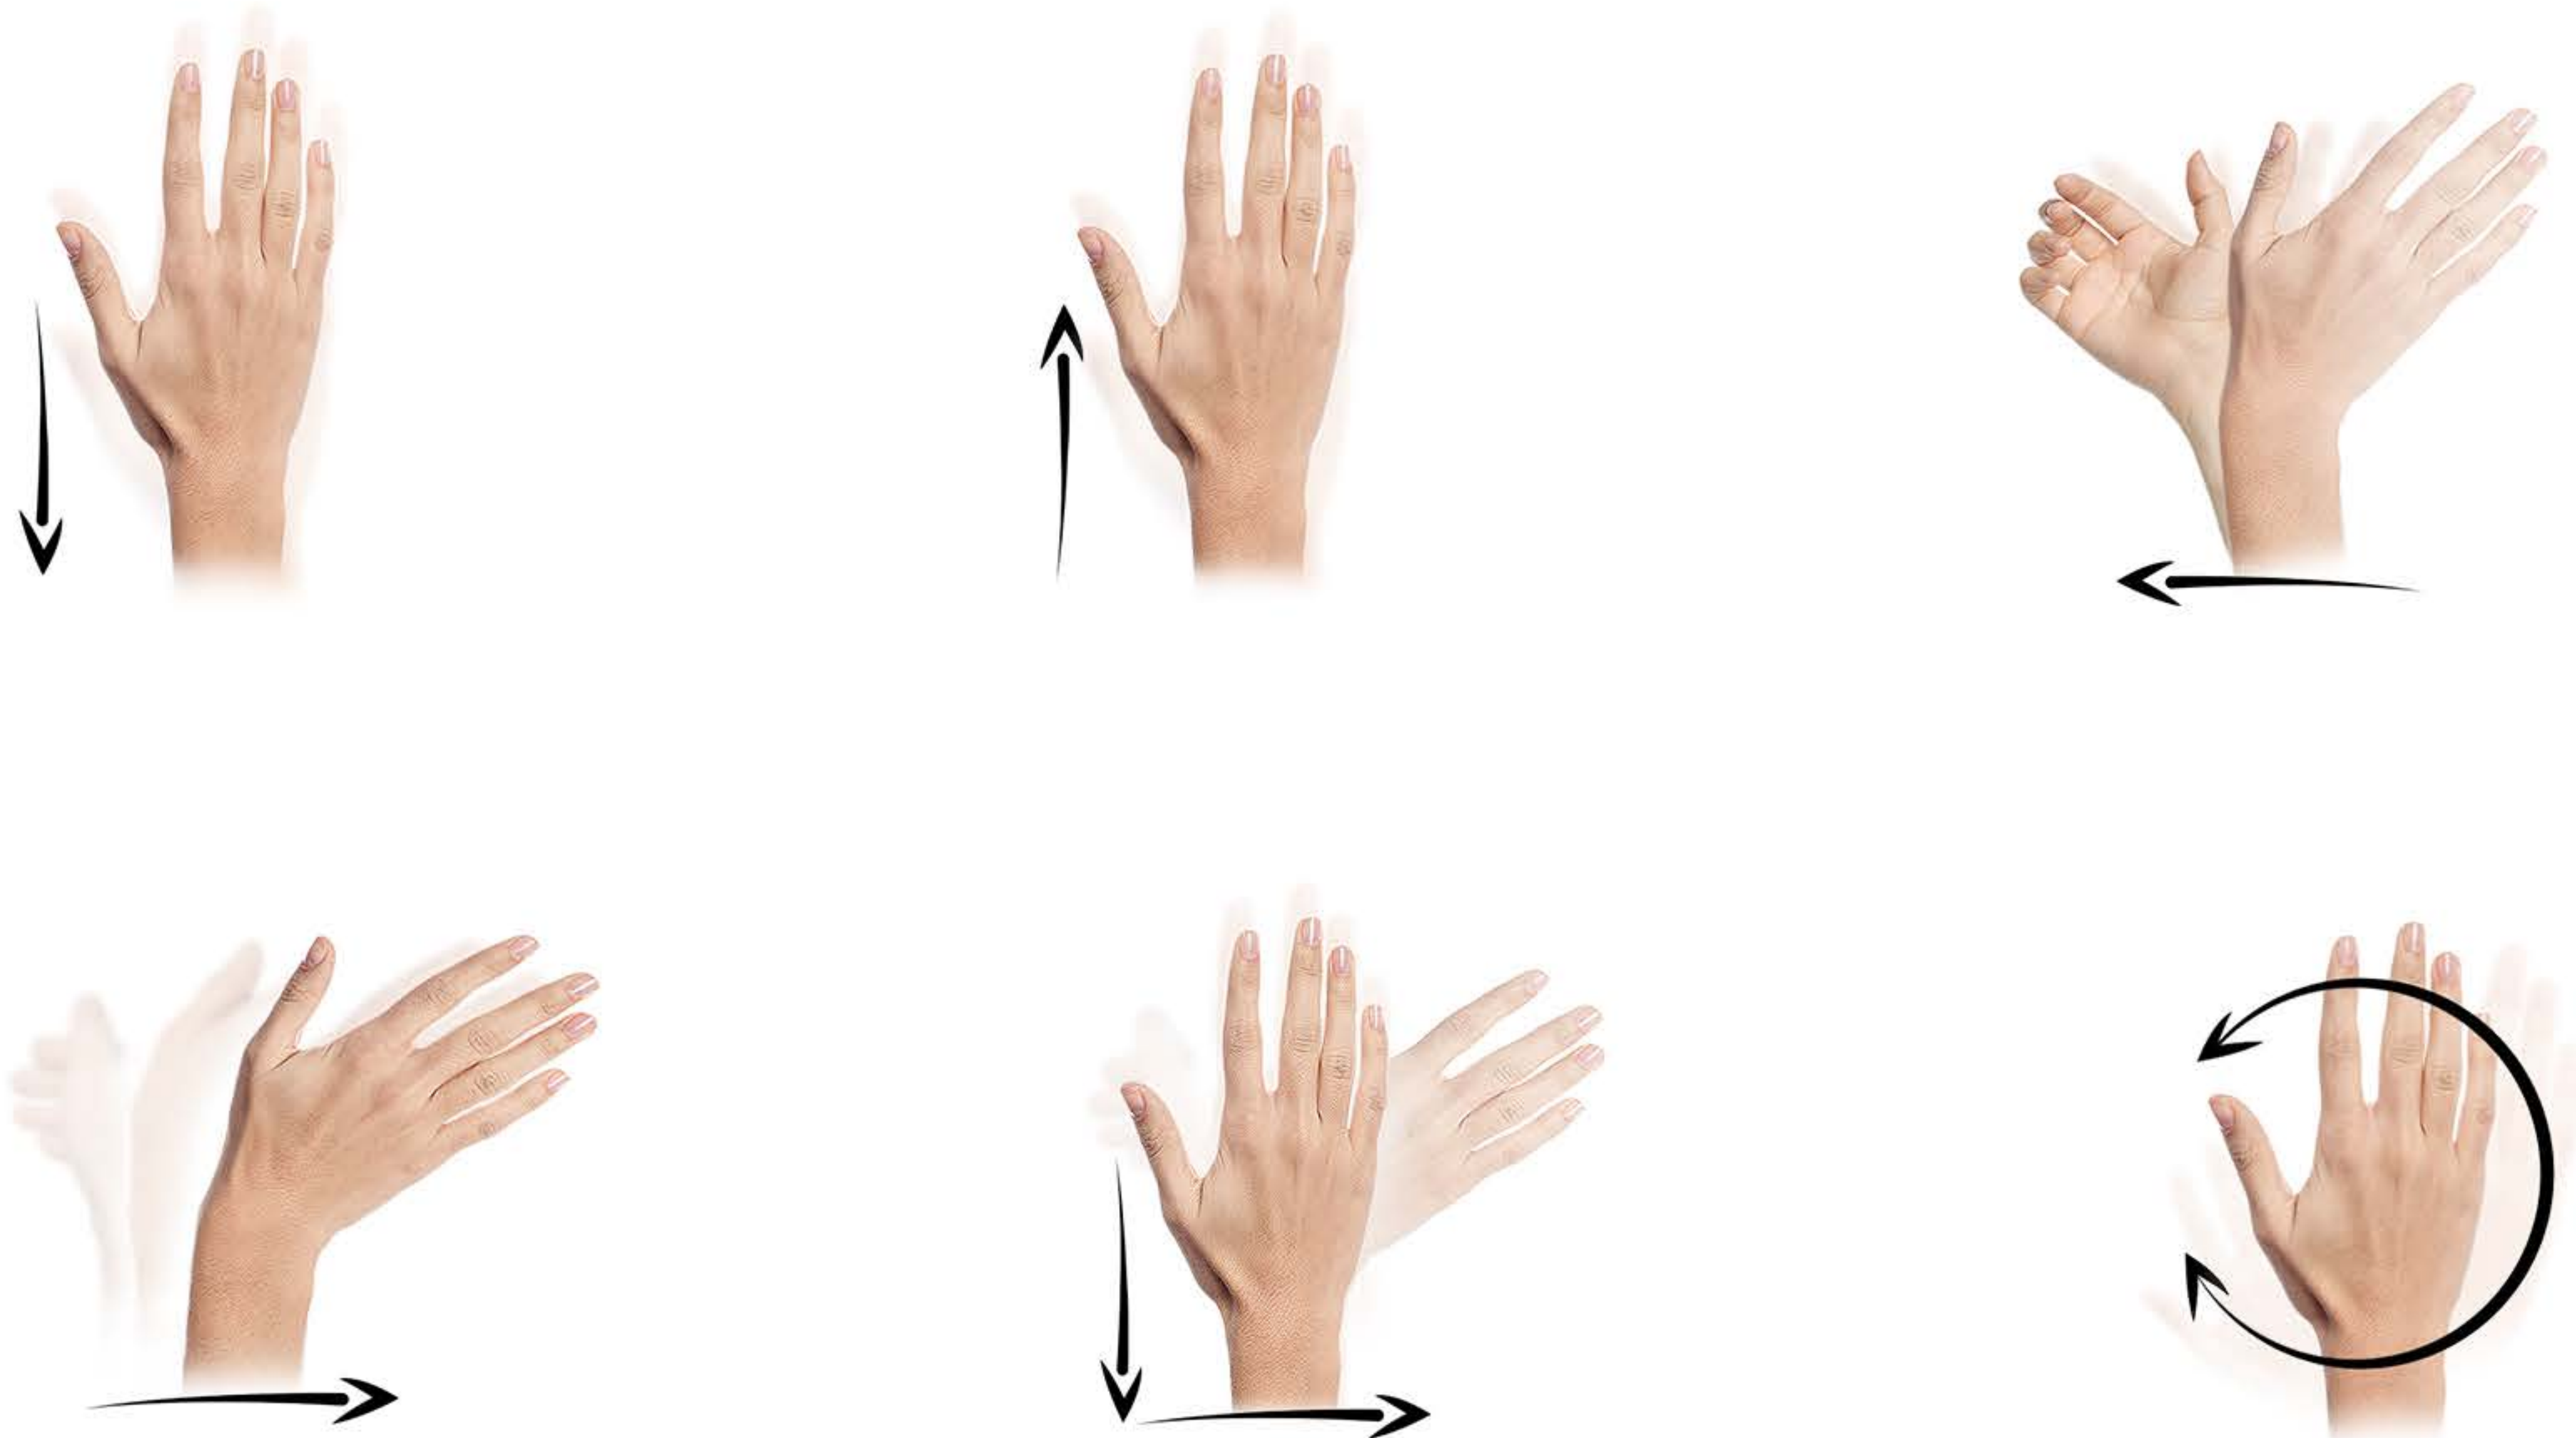

What is your next move?

Discover the power of gestures

With the wave of your hand you can change the color of the LED strips.

You can also control the heating and air conditioning temperature settings.

Other gestures are only a matter of your imagination. The intelligent SWIPE detects not only simple moves, but combinations of moves as well. The high resolution sensor interprets the most complex commands. You will be surprised by the power of your hands

More than precision

FIBARO SWIPE is equipped with the most precise 3D motion detecting sensor of its kind, which ensures flawless recognition of the performed gestures. Our innovative way of controlling home automation is not only spectacular, it's intuitive and user friendly.

Beautiful, just like you

Beautiful in every detail, the SWIPE frame allows you to easily change photos whenever you want. In just a moment's time, you can remove the front panel and enjoy all the memories of family vacations or holidays that bring a smile to your face.

Compliments Any Interior

It doesn't have to be a typical household device. SWIPE easily adapts to the character of any room in your house— the living room, kitchen, bedroom or office.

Put in on the Display...

You can put it on the dresser with your favorite family photos
or hang it on the wall, among other photographs.
It not only looks beautiful, but also reacts to your gestures.

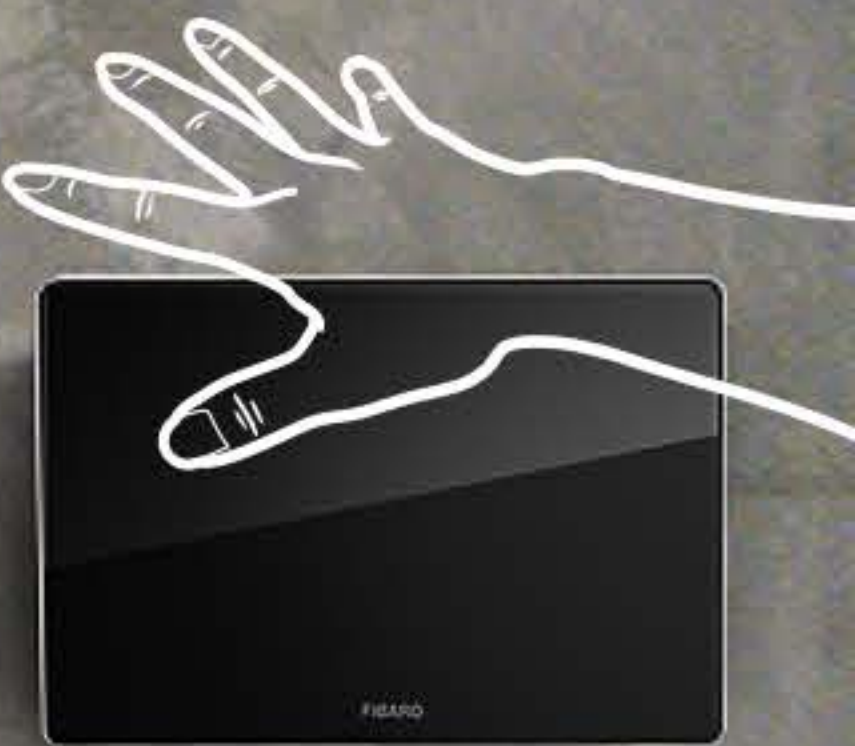

... Or Hide It

SWIPE doesn't have to be a part of your home's decoration, if you don't want it to be. You can hide the device under a kitchen counter, coffee table or desk. SWIPE is magical, so it reacts even through those surfaces! Swipe your hand over it - that's enough to turn on lights or radio.

Soon life without SWIPE will be hard to imagine

Gestures play important role in our lives. A handshake or thumbs up can speak a thousand words, and gestures are often used unconsciously and naturally. No different will be the gestures used to manage your home. FIBARO SWIPE will reveal the real potential of hand gestures.

Good morning! Time to get up!

Monday mornings don't have to be unpleasant. With FIBARO SWIPE, you can prepare fresh coffee and a hot bath right from your bed. Just swipe to the left to prepare your favorite coffee, or gesture your hand to the right and your bathtub will be filled with hot water.

It's going to be a beautiful day, don't you agree?

Smart Not Only at Home

Your workplace is called your second home for a reason. And home is a place where you should feel safe and comfortable. SWIPE will help create an inviting surrounding to make your office as comfortable as your home. With easy hand gestures, control the blinds, lights or projector.

Make Life Easier

Life can be made easier for the people you really care about. Show your loved ones the possibilities of a single movement of a hand – without having to get up from the chair. Ventilate the apartment, turn on the heat, or boil water for a tea. FIBARO SWIPE is the perfect solution for the elderly who find modern technology difficult to operate. Just one swipe of the hand and life becomes easier.

Heating:

69° > 70°

Hands Full of Dirt?

Well now you can count on your magical assistant!
One swipe of the hand is enough to turn on the lights.
Quick, clean and comfortable.

Reach Inaccessible Places

See how the impossible becomes possible.
Close the skylight windows and blinds with a wave of
your hand. Magic? No, it's SWIPE.

Control audio devices

Volume up, volume down, next song, bass boost...
Wave your hand and have full control over everything!

Open Up the Doors to your Imagination

SWIPE is technological magic, which can be used in many unconventional ways.

Which ones? It depends on you and your imagination.

Extremely advanced device with limitless capabilities is at your disposal!

Wave Goodbye

Going out? Use SWIPE to activate 'goodbye scene', i.e. lower your shades, turn off the lights and activate the alarm. Prepare home for your departure with a single gesture. There is no simpler solution.

Designed to Delight

The world's most innovative technology hidden beneath a smooth, pleasant and ergonomic casing. SWIPE is polished to be perfect in every detail, so it impresses in every possible way.
