Section 1 - Installing the Security Keypad

NOTE: The battery for the Security Keypad is not included. Please refer to instruction below to insert an AAA Alkaline Battery.

Back Plate

Keypad

AAA Battery

1. Undo the screw (1) on the bottom side of the Keypad (A) and remove the back plate.

2. Insert an AAA Battery.

B

Back Plate

B

Back Plate

3. Mount the back plate with the included screws (B).

4. Attach the Keypad on the back plate and tighten the screw (1) on the bottom of the Keypad.

Section 2 - Programming the Keypad with M-Series Main Console

NOTE: You can program in total up to 4 security keychain remotes or keypads to your M-Series Alarm System.

NOTE: The Security Keypads must be programmed in Zone 1.

1. Press the learn button on the back of the M-Series Main Console for 3 seconds until the Zone 1 light is flashing.

LED

Learn Button

2. Input Pin followed by the Disarm button. [Default Pin: 0 0 0 0]

Disarm Button

3. Once the keypad is programed to the M-Series Main Console, the Zone 1 LED light will be off.

Section 3 - Programming the Keypad with SkylinkNet Internet Hub

**NOTE:** Programming the keypad with the SkylinkNet Internet Hub must be done from the SkylinkNet App.

1. Go to "More" and tap on "System Settings".

2. Tap on "Setup Wizard".

3. Tap on "Add Device".

4. Tap on "Security Remote/Keypad".

5. Name your Security Keypad and tap "Continue".

6. Tap on the "Learn Now" button and input the PIN No. followed by the Disarm Button [Default Pin is 0000].

NOTE: The backlight will turn on when pressing the buttons.

NOTE: The factory default password is 0,0,0,0

Disarm
Input your PIN number followed by the [Disarm] button to deactivate the alarm system.

Arm Home
Input your PIN number followed by the [Arm Home] Button to protect while you're at home. This mode deactivates motion sensors but leaves other sensors activated.

Arm Away
Input your PIN number followed by the [Arm Away] Button to protect your home when you're away. This mode activates or triggers the alarm after a 45 seconds exit delay and gives you a 30 seconds entry delay to get-in your home to disarm the alarm system.

Panic Button
Press and hold the Panic Button for 3 sec. to activate the alarm.

NOTE: The factory default password is 0,0,0,0.

NOTE: The password can be 2-8 digits long and with a combination of buttons from 0-6.

1. Input current PIN [factory default 0 0 0 0] and press ✱ buttton.

2. Input the new PIN number followed by the ✱ button.

3. Input new PIN again and press the ✱ button.

NOTE: If the pin is different from step 2, the keypad will emit a long error beep and you have to re-start from step 1.

**NOTE:** If the Keypad emits 2 beeps, your pin has been successfully changed.

NOTE: Dispose of old battery promptly and properly.

NOTE: The Keypad is powered by an AAA Alkaline Battery.

When the operation range is reduced, or when the backlight LED does not flash during operation, it is time to replace the battery.

Follow the instructions below to replace the battery:

1. Undo the screw (1) on the back plate of the keypad.

2. Pry out the back plate from the keypad.

3. Take out the old battery (2) from the keypad.

4. Place the new battery (2) in position. Beware of the polarity.

5. Close the back plate and re-insert the screw (1).

Problem	Solution
The M-Series Main Console does not respond to the keypad?	- You must program the keypad to the M-Series Main Console or the SkylinkNet Internet Hub before they can work together. - Ensure to input the correct password.
Can I erase just one keypad from a zone in the M-Series Main Console?	- You must erase all the Keyapd and Remotes and then program the keypad/remote you want to keep.
