

# Setting Up The Yale Connect Wi-Fi Bridge

The Yale Connect Wi-Fi Bridge is easy to set up. Just plug the Yale Connect Wi-Fi Bridge into an outlet within 15 feet of your Yale Smart Lock.

Wait for a green light to flash on the Wi-Fi Bridge. If you don't see the light, press and hold the button on the Wi-Fi Bridge for 5 seconds.

In the Yale Home App, select the side menu (upper left of the screen), tap Set Up New Device, choose Set Up a Connect Bridge, and pair a Yale lock with the Bridge.
