014 – 015	Product Overview

Easy to use and beautiful to look at

The thinnest design

The unique design reduces the encumbrance to only 7.8mm after flush mount installation that allows perfect compatibility with every environment.

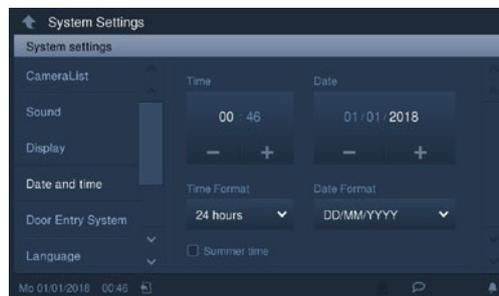

—
Frameless and glass finish panel

Elegant outlook with 7"capacitive touch screen enhanced by the glossy finished glass effect.

Easy operation with intuitive icon and interface design

Thanks to its intuitive design, using the panel is as easy as saying "hello". Even without prior experience, residents can instantly understand the easily recognized symbols and functions at a glance.

New design for lock and light controls

Totally new design, lets you manage all your doors and lights in one page including naming, configuring, and controlling them. Every detail is under your control.

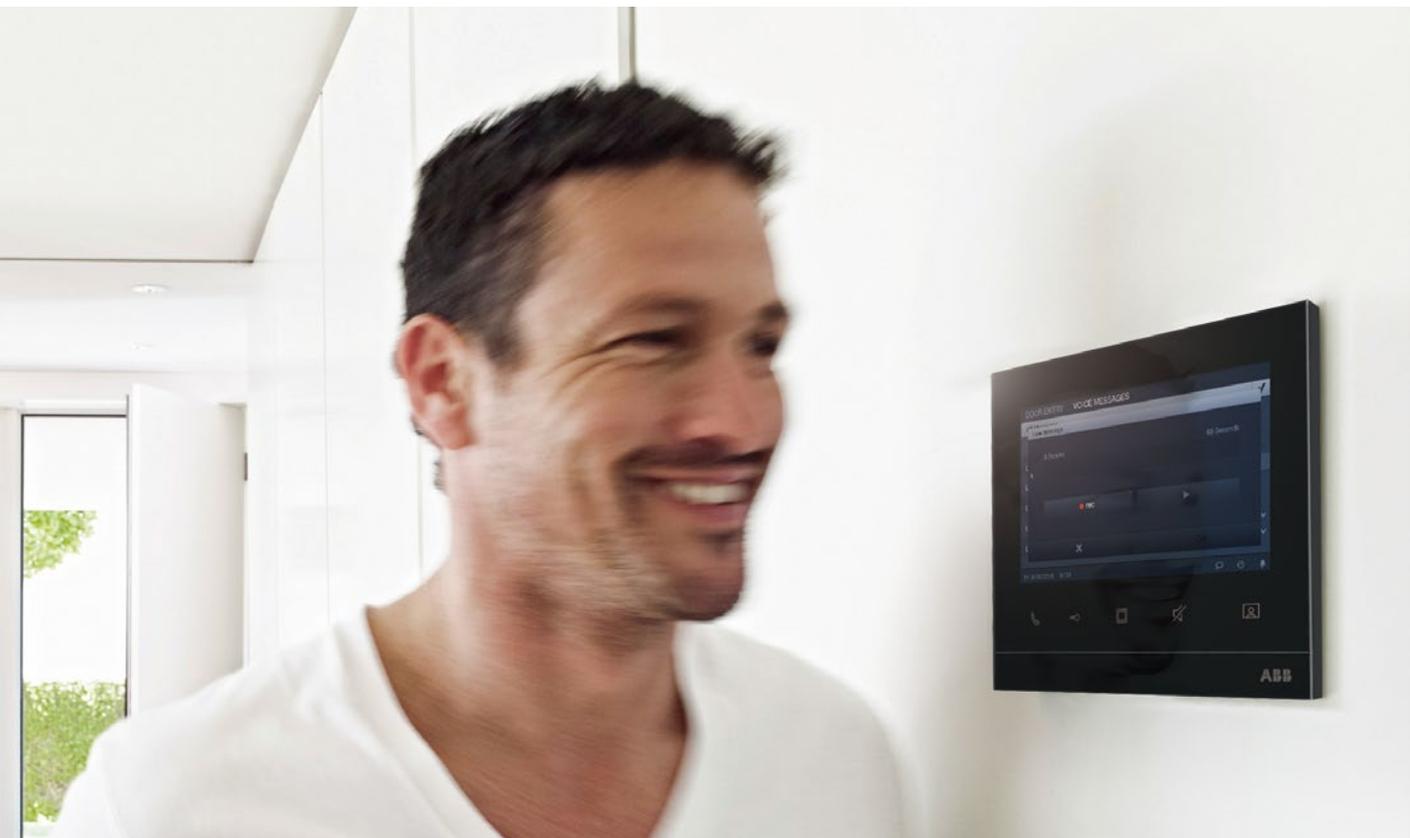

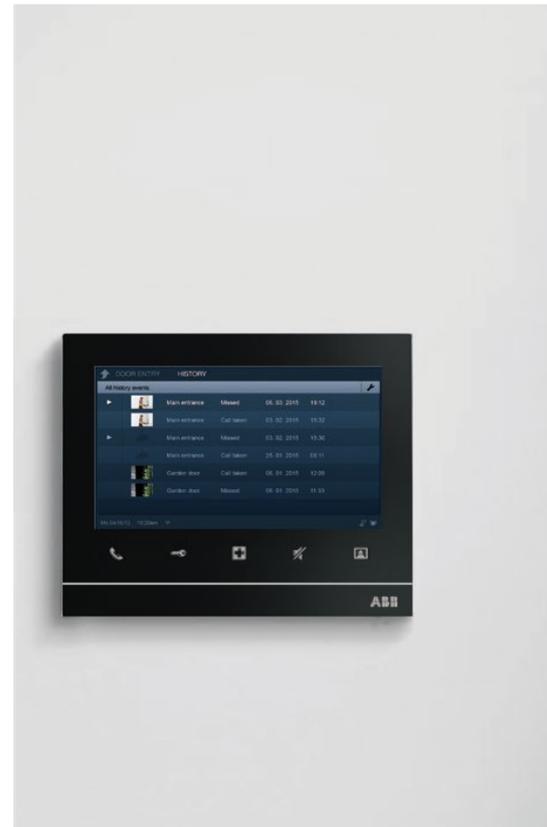

Easy to communicate

Leave message for visitors and family members

You can leave not only an audio message for your family when you are not home, but also you can make the panel as an answering machine for visitors.

Record video and audio messages from visitors

Never miss any guest's visit from now on. With the new 7" panel even if you not home, the panel will automatically store pictures and videos of guests through the outdoor station.

Customized doorbell tone

Say goodbye to unchangeable doorbell ring. Now you can customize your favorite songs as panel's incoming call ringtone. Store the songs in SD card then put it in the panel. You can choose what you like.

Welcome home with security and comfort

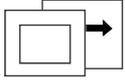

Multi camera surveillance and video door call function

You can use a surveillance button to connect with outdoor stations or external cameras at any time. You can see the images from the default outdoor station or external cameras. Also, you can activate the camera when pressing the doorbell button. All these functions now combine into one system.

Installation without limitation

Support multi installation type

One panel can be used in surface-mounted, flush-mounted and desktop installation with different box that suits any living environment to perfection.

— Surface-mounted

— Flush-mounted

— Desktop installation

2-wire standard installation

Forget installation complexity and keep the simplicity of 2 wire non-polarized installation.

One power supply can maximum support 20 panels at the same time
