

The **I-DoorBell Fon** is a professional grade IP-based doorbell entry system for the home or business, manufactured by American Communication & Networks Corp. - a company with more than **20 years** experience in Door Entry System.

When someone rings this doorbell, your tablet or smartphone will be notified through an app notification and smartphone's video or text message. A wireless door chime (Battery Power and 110V powered) can also ring. 1-way video and 2-way communication allows you to converse with whoever is at the door. The infrared filter allows for nighttime use. A contact closure is available and can be connected to an electric or magnetic lock allowing you to control the entry way through your tablet or smartphone. The doorbell intercom unit is connected through WiFi or LAN and can be powered by preexisting doorbell chime connections. The product comes in 4 different colors (Black, Silver, Brass, and Bronze.)
