

Cable clip

Crafted for efficiency and durability, this compact yet robust clip is designed to simplify your installations in new constructions. Its ingenious design allows for easy mounting on standard studs, whether wood or metal, using nails or screws. Simply position the clip and secure it in place to mark and hold your cables securely during rough-ins and through the construction process. Replace bulky rough-in brackets or boxes with DataComm's Cable Clip.

Features

- Sturdy 1.4" ABS Plastic mounting tab & bracket to withstand other trades during construction.
- Flexible pass through wing allows for a variety of cables to go through opening, while keeping them in place & not damaging cable.
- Bright yellow color allows for clip to be seen by contractor & other subs.
- Quick & easy to install
