- B. LED indicator**
- C. Z-Wave controlled outlet** – remotely turn ON/OFF the connected device
- D. Always-on outlet** – provides continuous power
- E. Security tab** – secures the plug to the wall outlet

Device Configuration

Adding your device to a Z-Wave network

1. Follow the instructions for your Z-Wave certified controller to add a device to the Z-Wave network.
2. Once the controller is ready to add your device, press the program button of the smart switch.

You have complete control to turn your lamp ON/OFF according to groups, scenes, schedules and interactive automations programmed by your controller.

If your Z-Wave certified controller features remote access, you can control your lamp from your mobile devices.

If prompted by the controller to enter the S2 security code, refer to the QR code/security number on the side of the box or the QR code label on the product (see Figure 1). Enter the 5-digit code.

Figure 1

To remove and reset the device

1. Follow the instructions for your Z-Wave certified controller to remove a device to the Z-Wave network.
2. Once the controller is ready to remove your device, press the program button of the smart switch.

To return to factory defaults

1. If plugged in, unplug the switch from the receptacle.
2. Press and hold the program button for at least three seconds while you plug the switch into a receptacle.

NOTE: This should only be used if your network's primary controller is missing or otherwise inoperable.

NOTE: SmartStart enabled products can be added into a Z-Wave network by scanning the QR code on the product with a controller providing SmartStart inclusion. No further action is required and the SmartStart product will be added automatically within 10 minutes of being switched on in the network vicinity.
