

www.keenhome.io

A home should be a sanctuary and not another source of stress. Our devices enhance a home's core functions—so your home can take care of you.

KEEN HOME ZONING

The Perfect Temperature In Any Room

Keen Zoning makes a home more comfortable and energy efficient by giving full control over room-by-room temperatures.

ZONING IN MINUTES

Welcome to Keen Zoning

Smart Vents™ adjust airflow to over-conditioned rooms and redirect this airflow to rooms that need it most. Temp Sensors allow you to set a unique temperature for each room. Control the system with the Keen Smart Bridge and a smartphone.

“It’s like having a thermostat in every room”

HOT  COLD

Regular Vents

Smart Vents™

Temperature and Humidity

The portable Temp Sensor allows you to set a unique temperature for each room.

Wireless Connectivity

Advanced wireless technology creates a robust mesh network throughout the home.

Air Purification

IAQ management with optional Smart Filters featuring 3M™ filtration technology.

Smartphone Control

Complete system control with any Apple™ or Android™ smartphone.

Pressure Safety

Vent sensors detect air pressure and temperature to ensure safe airflow regulation.

Faceplates

Our unique line of faceplates are interchangeable, paintable, and removable for easy cleaning.

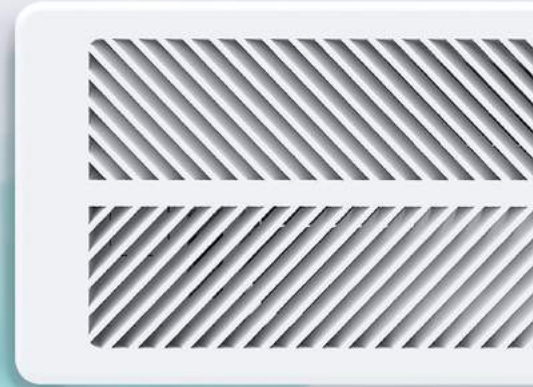

Quiet Operation

Our novel louver system ensures quiet operation and enables variable airflow occlusion.

Battery Life

Advanced control algorithms enhance battery life, extending it for years.

THE APP

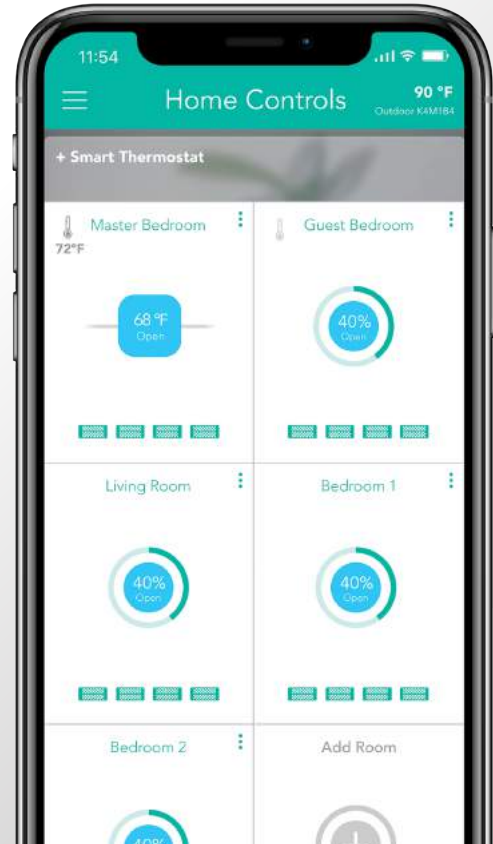

Control the Keen Zoning System

Schedule when rooms are occupied

Control how much air reaches each room of the home to enhance comfort and reduce energy usage.

Set a specific temperature for any room

Automatically balance temperature throughout the home.

Connect a smart thermostat

Connect to supported smart thermostats and a growing list of smart devices.

Easily connect devices

Enhance the system with useful smart home integrations.

Manually control airflow levels

Ensure each room is receiving the proper amount of airflow.

CONTROL YOUR AIRFLOW

The Smart Vent™

802.15.4 radio allows integration with connected home platforms and connected thermostats

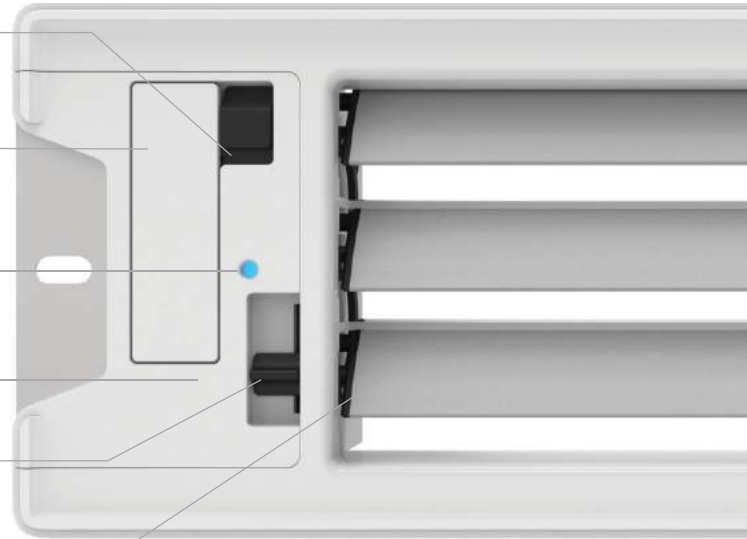

4 x AA batteries (included) provide years of operation

Heating/Cooling status indicator

Temperature and pressure sensors ensure accurate and safe operation

Manual control lever

Airfoil louvers ensure quiet operation

CONNECT YOUR SYSTEM

The Smart Bridge™

Compact Design

The lightest, most compact smart home bridge around. Its small size makes it easy to tuck into a cabinet.

Cloud Integration

The Smart Bridge seamlessly connects to a home's Wi-Fi router and the cloud to enable control of Smart Vents and other devices.

Wireless signal repeating

Any Smart Bridge™ can act as a ZigBee wireless repeater, helping extend the range of the Keen Zoning System.

Wall or on any surface

COMPLETE TEMPERATURE CONTROL

Smart Thermostat Integrations

Nest Learning Thermostat

As a Works with Nest partner, we give you a seamless and powerful tool to regulate central HVAC airflow.

Control a Nest Learning Thermostat and Keen Home Smart Vents from a single interface with the Keen Home app and take full charge of whole-home comfort and temperature control.

ecobee

Keen Home Smart Vents work with the ecobee4, ecobee3, and ecobee3 lite thermostat and ecobee3 room sensors to provide room-by-room temperature control throughout your home. It's like having a smart thermostat in every room.

BREATHE EASY

The Smart Filter™

Uncompromising Tech

HAF technology from 3M™ guarantees filtering from allergens, germs, and air pollutants without sacrificing heating and cooling performance.

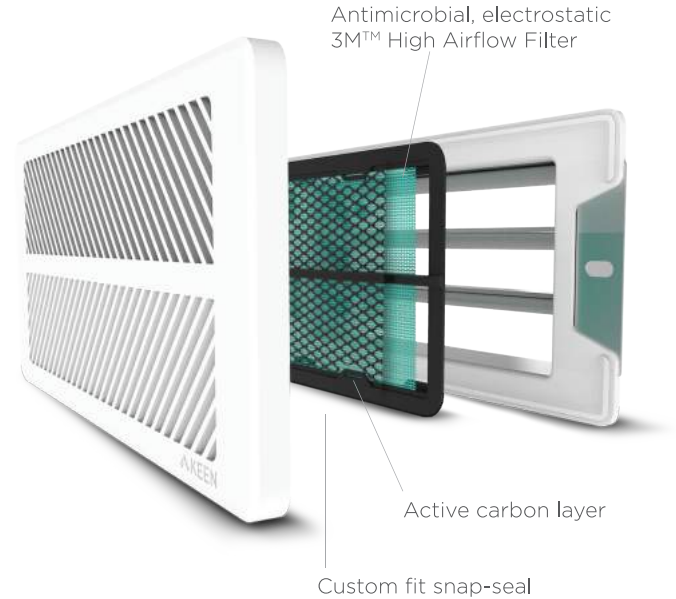

Real-Time Monitoring

Automatically receive refills based on analysis of HVAC usage.

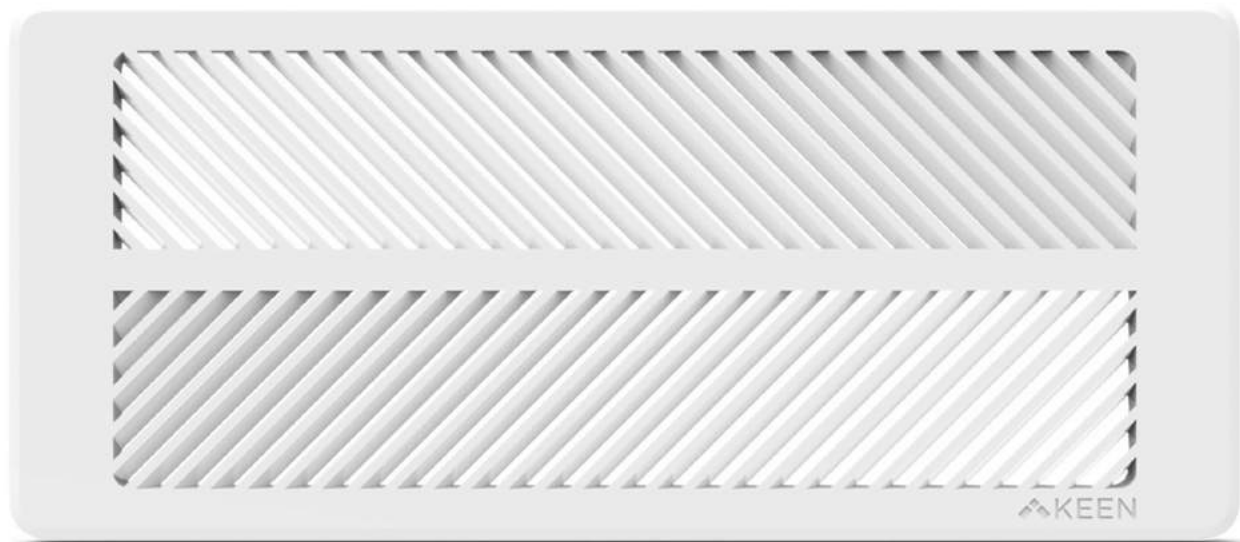

Magnetic Fit

Makes changing filters a snap.

PREVENT CATASTROPHIC FLOODING

The Smart Pump Monitor

Proactive Monitoring

Monitor the health of your pump's motor, track water level, and analyze weather. Wi-Fi connectivity with optional cellular backup.

Better Data

Track and analyze water tables and intrusion patterns for more accurate flood mapping.

Automated Maintenance

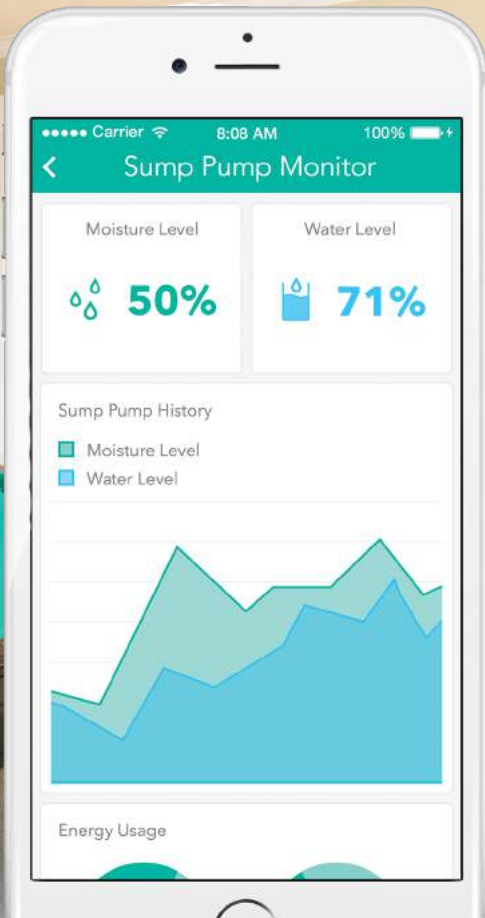

Extend the life of your sump pump with automated maintenance.

Accommodates primary and backup sump pumps. DIY plug-and-play installation (no wiring)

Keen Home provides alerts and optional managed services (contact plumber, etc.)

Detects mold risk and other harmful contaminant levels

REAL TIME HOME SYSTEMS MONITORING

Your Home Health Dashboard

Peace of Mind

Know that your most important asset is being proactively monitored.

Effective Alerts

We use your most prevalent screen, your TV, to display your dashboard and alerts.

Smartphone Control

Your Home Health Dashboard goes wherever you go with full smartphone control.
