INTRODUCTION
Leviton’s Vizia RF+™ components are designed to communicate with each other via Radio Frequency (RF) to provide remote control of your lighting. Using RF technology allows Leviton to provide the greatest signal integrity possible. Each node in Leviton’s Vizia RF+™ component line is a Z-Wave® enabled device. In a Z-Wave® network, each device is designed to act as a router. These routers will re-transmit the RF signal from one device to another until the intended device is reached. This ensures that the signal is received by its intended device by routing the signal around radio dead spots. This 4-Zone Controller is meant to control special zone enabled Z-Wave® products. To control groups of devices that are mixed or do not support zone command class use the Leviton 4-Scene Controller (VRC5k). Setting up this device requires specific advanced controller functionalities, your controller must be able to associate device to groups and must be able to control the zone controller configuration commands such as the advanced Programming Remote (VRCPG).

FEATURES
- Switch ON/OFF
- Zone Capable
  - This is a Z-Wave® Controller
  - Zone control without traveler wires
  - Can call 4 zones
  - Can control a single load
  - ON/OFF LED
  - Two way communication
  - RF reliability
  - Ease of installation – No new wiring
  - Compatible with other Z-Wave® enabled devices

INSTALLING YOUR 4-ZONE CONTROLLER WITH SWITCH

WARNING: DO NOT ATTEMPT TO MOUNT OR USE THE 4-ZONE CONTROLLER WITH SWITCH WITHOUT FOLLOWING THE INSTALLATION INSTRUCTIONS. INACCURATE INSTALLATION COULD RESULT IN DANGEROUS SITUATIONS.

WARNING: A 4-ZONE CONTROLLER WITH SWITCH IS A Z-WAVE® CONTROLLER. THIS CONTROLLER IS MEANT TO CONTROL SPECIAL ZONE ENABLED Z-WAVE® PRODUCTS.

NOTE: This information will be stored in the Programmer/Remote to be used for future reference.
NOTE: You may name or edit your device at this time.

INSTALLATION INSTRUCTIONS

The Primary Programmer/Remote will assign a Home ID and Node ID for this device.

WARNING: Connect ON/OFF LED of circuit breaker or fuse when servicing, installing or removing fixture.
WARNING: Disconnect power at circuit breaker or fuse before performing any maintenance or installation.
WARNING: Maximum wire length from dimmer to all installed remotes cannot exceed 300 ft (90 m).
WARNING: Use only this device with copper or copper clad wire.

After frame is removed, remove existing push buttons and replace them with desired color change push buttons. To change the DIM/BRIGHT button, before mounting frame, press out DIM/BRIGHT button (bottom) from back of frame and then press the back button (top) from back of frame to DIM/BRIGHT button. To make IR capable, replace with a DIM/BRIGHT button that has the IR window.

Steps to follow as follows:

1. Push in side at tab to release
2. Line up tabs and press in side to attach
3. Prepare and connecting wires:
   - This 4-Zone controller can be wired using side wire terminal screws or through backwire openings. Choose appropriate wire stripping specifications accordingly.
   - Connect wires per WIRING DIAGRAM as follows:
     - Green or bare copper wire in wall box to Green terminal screw.
     - Line Hot wall box wire to terminal screw marked “BK”.
     - Neutral wall box wire to terminal screw marked “WH”.
     - Load wall box wire to terminal screw marked “RD”.
4. Testing your device prior to mounting in wall box:
   - Position all wires to provide room in outlet wall box for device.
   - Ensure that the word “TOP” is facing up on device strap.
   - Pullfully screw in mounting screws in wall box mounting holes.
   - Dress wires with a bend as shown in diagram to relieve stress when mounting device.
   - Restore power at circuit breaker or fuse.
   - LED should turn ON.
   - Toggle button 1 ON/OFF to test local load operation.
5. If LED or LOAD does not turn ON, refer to the TROUBLESHOOTING section.

NOTE: This information will be stored in the Programmer/Remote to be used for future reference.
NOTE: You may name or edit your device at this time.

WARNING: Connect ON/OFF LED to circuit breaker or fuse before performing any maintenance or installation.
WARNING: Disconnect power at circuit breaker or fuse before servicing, installing or removing fixture.
WARNING: Maximum wire length from dimmer to all installed remotes cannot exceed 300 ft (90 m).
WARNING: Use only this device with copper or copper clad wire.

Device Mounting:
- TURN OFF POWER AT CIRCUIT BREAKER OR FUSE.

Testing your device prior to mounting in wall box:
- Position all wires to provide room in outlet wall box for device.
- Ensure that the word “TOP” is facing up on device strap.
- Pullfully screw in mounting screws in wall box mounting holes.
- Dress wires with a bend as shown in diagram to relieve stress when mounting device.
- Restore power at circuit breaker or fuse.
- LED should turn ON.
- Toggle button 1 ON/OFF to test local load operation.

Installing may now be completed by tightening mounting screws into wall box. Attach wallplate.

WIRING DEVICE:

- Connect wires per WIRING DIAGRAM as follows:
  - Green or bare copper wire in wall box to Green terminal screw.
  - Line Hot wall box wire to terminal screw marked “BK”.
  - Neutral wall box wire to terminal screw marked “WH”.
  - Load wall box wire to terminal screw marked “RD”.

CAUTIONS:
- Disconnect power of circuit breaker or fuse when servicing, installing or removing fixture.
- Maximum wire length from dimmer to all installed remotes cannot exceed 300 ft (90 m).
- Use only this device with copper or copper clad wire.

Tools needed to install your device:
- Slotted/Phillips Screwdriver
- Electrical Tape
- Pliers
- Ruler

Changing the color of your device:
Your 4-Zone controller with switch includes three color options. The controller ships with the White frame attached. To change color of frame, proceed as follows:

1. Push in side at tab to release
2. Line up tabs and press in side to attach
3. Preparing and connecting wires:
   - This 4-Zone controller with switch can be wired using side wire terminal screws or through backwire openings. Choose appropriate wire stripping specifications accordingly.
   - Connect wires per WIRING DIAGRAM as follows:
     - Green or bare copper wire in wall box to Green terminal screw.
     - Line Hot wall box wire to terminal screw marked “BK”.
     - Neutral wall box wire to terminal screw marked “WH”.
     - Load wall box wire to terminal screw marked “RD”.

After frame is removed, remove existing push buttons and replace them with desired color change push buttons. To change the DIM/BRIGHT button, before mounting frame, press out DIM/BRIGHT button (bottom) from back of frame and then press the back button (top) from back of frame to DIM/BRIGHT button. To make IR capable, replace with a DIM/BRIGHT button that has the IR window.

Installation may now be completed by tightening mounting screws into wall box. Attach wallplate.

WIRING DEVICE:

- Connect wires per WIRING DIAGRAM as follows:
  - Green or bare copper wire in wall box to Green terminal screw.
  - Line Hot wall box wire to terminal screw marked “BK”.
  - Neutral wall box wire to terminal screw marked “WH”.
  - Load wall box wire to terminal screw marked “RD”.

Testing your device prior to mounting in wall box:
- Position all wires to provide room in outlet wall box for device.
- Ensure that the word “TOP” is facing up on device strap.
- Pullfully screw in mounting screws in wall box mounting holes.
- Dress wires with a bend as shown in diagram to relieve stress when mounting device.
- Restore power at circuit breaker or fuse.
- LED should turn ON.
- Toggle button 1 ON/OFF to test local load operation.

If LED or LOAD does not turn ON, refer to the TROUBLESHOOTING section.

NOTE: Only one device may be included at any time.

If using VRCPG Programmer/Remote, you will be prompted to place 4-Zone controller into programming mode.

D) While standing close to the 4-Zone controller (approximately 1 ft.), press the center button on the Programmer/Remote to awake device.
NOTE: Only one device may be included at any time.

E) The Primary Programmer/Remote will assign a Home ID and Node ID for this device.
NOTE: This information will be stored in the Programmer/Remote to be used for future reference.
NOTE: You may name or edit your device at this time.

F) The 4-Zone controller is now installed in the network. If using VRCPG you will be prompted to include switch, otherwise, please proceed to Step G to include switch.

Installing may now be completed by tightening mounting screws into wall box. Attach wallplate.

WIRING DEVICE:

- Connect wires per WIRING DIAGRAM as follows:
  - Green or bare copper wire in wall box to Green terminal screw.
  - Line Hot wall box wire to terminal screw marked “BK”.
  - Neutral wall box wire to terminal screw marked “WH”.
  - Load wall box wire to terminal screw marked “RD”.

Testing your device prior to mounting in wall box:
- Position all wires to provide room in outlet wall box for device.
- Ensure that the word “TOP” is facing up on device strap.
- Pullfully screw in mounting screws in wall box mounting holes.
- Dress wires with a bend as shown in diagram to relieve stress when mounting device.
- Restore power at circuit breaker or fuse.
- LED should turn ON.
- Toggle button 1 ON/OFF to test local load operation.

If LED or LOAD does not turn ON, refer to the TROUBLESHOOTING section.

NOTE: Only one device may be included at any time.

If using VRCPG Programmer/Remote, you will be prompted to place 4-Zone controller into programming mode.

D) While standing close to the 4-Zone controller (approximately 1 ft.), press the center button on the Programmer/Remote to awake device.
NOTE: Only one device may be included at any time.

E) The Primary Programmer/Remote will assign a Home ID and Node ID for this device.
NOTE: This information will be stored in the Programmer/Remote to be used for future reference.
NOTE: You may name or edit your device at this time.

F) The 4-Zone controller is now installed in the network. If using VRCPG you will be prompted to include switch, otherwise, please proceed to Step G to include switch.
This warranty excludes and there is disclaimed liability for labor.

NOTE: The remedies provided therein are the exclusive remedies under this warranty, whether based on contract, tort or otherwise.

NOTE: Excluding 4-Zone Controller with Switch from warranties of any kind, including merchantability and fitness for a particular purpose for removal of this product or reinstallation. This warranty is void if this product is installed improperly or in an improper environment, overloaded, misused, abused, or altered in any manner, or is not used under normal operating conditions or not in accordance with any labels or instructions. There are no other implied warranties of any kind, including merchantability and fitness for a particular purpose. This warranty is not transferable to incidental, indirect, special, or consequential damages, including without limitation, damage to, or loss of use of, any equipment, lost sales or profits or delay or failure to perform this warranty obligation. The remedies provided herein are the exclusive remedies under this warranty, whether based on contract, tort or otherwise.

NOTE: If your 4-Zone controller with switch is not responding, or you are unable to control it after you have tried to include/exclude it multiple times, it may be necessary to reset the 4-Zone controller with switch to its original factory settings. To accomplish this, proceed as follows:

- On the 4-Zone controller with switch (refer to figure), press and hold button 1 and 3. Wait approximately 10 seconds until the LED turns solid red. Then press and hold button 2 and 4. The 4-Zone controller with switch is now reset. Once the controller is reset, it will be necessary to re-include it to a network before it can be used.

CAUTION: SETTING A DEVICE TO A FACTORY DEFAULT DOES NOT EXCLUDE THAT DEVICE FROM A NETWORK. THE EXCLUSION PROCEDURE MUST STILL BE FOLLOWED TO REMOVE THE DEVICE FROM THE PRIMARY CONTROLLER.

LIMITED 5 YEAR WARRANTY AND EXCLUSIONS

Leviton warrants to the original consumer purchaser and not for the benefit of anyone else that this product at the time of its sale by Leviton is free of defects in materials and workmanship under normal and proper use for five years from the purchase date. Leviton's only obligation is to correct defects by repair or replacement, at its option, if within such five year period the product is returned prepaid, with proof of purchase date, and a description of the problem to Leviton Manufacturing Co., Inc., Att. Quality Assurance Department, 201 North Service Road, Melville, New York 11747. This warranty excludes and is disclaimed liability for labor for removal of this product or reinstallation. This warranty is void if this product is installed improperly or in an improper environment, overloaded, misused, abused, or altered in any manner, or is not used under normal operating conditions or not in accordance with any labels or instructions. There are no other implied warranties of any kind, including merchantability and fitness for a particular purpose. This warranty is not transferable to incidental, indirect, special, or consequential damages, including without limitation, damage to, or loss of use of, any equipment, lost sales or profits or delay or failure to perform this warranty obligation. The remedies provided herein are the exclusive remedies under this warranty, whether based on contract, tort or otherwise.

For additional information, contact Leviton’s Technical Support at 1-800-233-8381 or visit Leviton’s website at www.viziRFplus.com

Send in your 4-Zone Controller with switch to Leviton’s Factory Repair Center:

Leviton Factory Repair Center
110 North 12th Street
Latham, NY 12110

Pack the Controller in the original shipping carton or provide sufficient packaging to prevent damage. Include a copy of the purchase receipt, a description of the problem, and the product serial number.
