

Fiber Management Spools AC1041

The Fiber Management Spools are designed to neatly organize and manage fiber within a structured wiring enclosure. The half round design and hole spacing allows for both horizontal (full or half width) and vertical installation.

The 1/2" retention tabs contain excess fiber while notched openings allow the fiber to be neatly secured with included cable ties. The 1.5" spool radius maintains proper bend requirements for fiber as well as for use with category cable.

FEATURES & BENEFITS

- Neatly organize and manage fiber within structured wiring enclosure
- 1.5" spool radius maintains proper bend requirements for fiber and category cable
- Half round design and multiple mounting holes provide versatile installation options
- Sold as a pair and includes (4) plungers and grommets and (2) 4" cable ties
- Constructed of durable ABS Plastic
