

swipe-based user interface for security and smart home control, Dual Path and cloud connectivity over LTE and Wi-Fi for intelligent redundancy, reliability and speed. It also features a built-in panel camera to capture disarm photos, Z-Wave Plus support for lifestyle devices; two-way voice, standard 24-hour lithium-ion battery, UL-rated siren, a built in Glass Break Detector, the ability to view live video cameras on the screen, powerful system health diagnostics and over the air SW updates. The IQ Panel is the most powerful security and smarthome solution you can buy. The IQ Panel 2 was named a Top 30 Award Winner by SSI for 2017 and previously earned the prestigious 2016 TechVision Challenge award, a form of "Best in Show" at the Electronic Security Expo (ESX).

Qolsys IQ Panel platforms are powered by Android and are tightly integrated with Alarm.com's market-leading connected home services platform, supporting interactive security, video monitoring, energy management and home automation, resulting in increased conversion, end-user satisfaction, fewer dealer truck rolls, improved customer support and decreased total cost of ownership.
